Message from the President

I am honored to lead INGESA as a President and Director.

INGESA is a 38-year Spanish company leader in the manufacture of the most competitive equipment for the concrete admixtures: pumps, dispensers and flowmeters.

INGESA strives to provide every client solutions and exceptional service. We are proud of working closely with you to determine and design the best equipment to satisfy your needs, always offering the knowledge and expertise of our employees.

We are a growth company. Our export management team is implementing a strategy to guide the Company for the many years to come. Since 2011 we have been expanding all around the world. Our mission is to keep expanding throughout new countries and investing in the most innovative equipment.

Our main drive is to build trust among our clients. We encourage you to explore our website to learn more about us.

Thank you for your interest in our Company and your time.

Sincerely,

David Ordóñez
President and Director

It all began in 1977

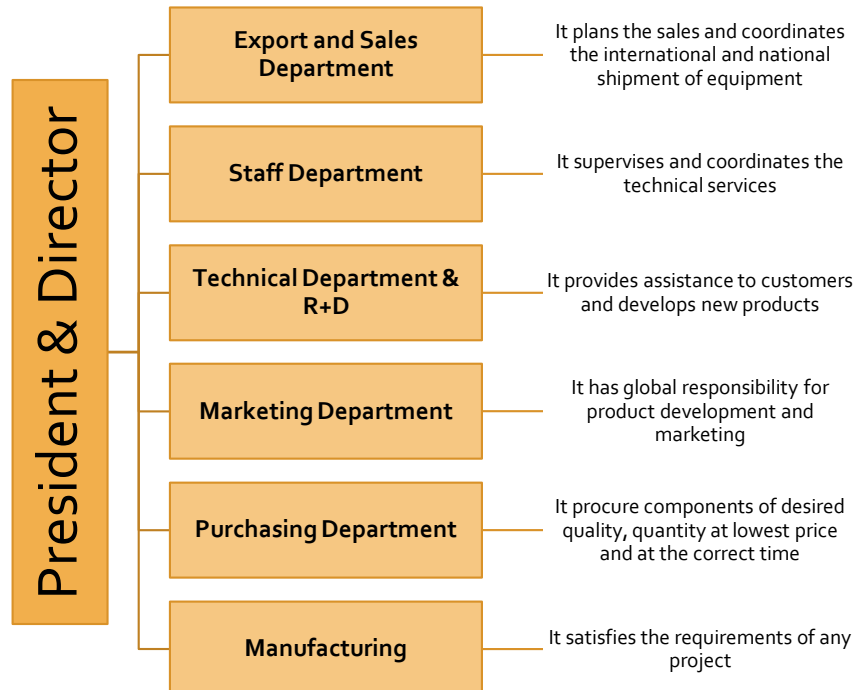

- INGESA is a family-owned company settled down in Barcelona (Spain) in 1977 to design and manufacture systems for water and other chemical liquids.
- During the early days of the 70's, we achieved a prominent place in the market employing the most state-of-the-art technologies: Additives dispensers, Batchers, Ozone Sterilisation, Desalination by Reverse Osmosis, Ion Exchange Demineralization, Organic products for potable water and industrial boilers.
- In 1988 the company started to be known as INGESA - Instalaciones Generales y Servicios del Agua, S.L.-, specialised in the manufacture of additives dispensers, pumps and flowmeters for different kinds of industry: construction, chemicals, painting, and coatings, among others.

- Automation started to gain in importance when including additives for concrete and mortars. We became one of the leaders in the Spanish market and in 2011 we started our international expansion.

INGESA Group

- Due to our qualified and technical know-how, we are able to comply with the higher quality requirements, capacity and costs efficiency.
- The INGESA Group has a global workforce of approx. 18 exclusive Delegations or Technical Services spread by all the Spain market.
- Our head office in Badalona (Barcelona, Spain) covers the following departments:

Certificates

- Bureau Veritas certifies the Certification ISO 9001 to our company, a standard for the management, manufacturing, installation and maintenance of admixtures dispensers. ISO 9001 certification gets our quality management system recognized globally. Demonstrate our compliance and commitment to industry-respected practices; stay competitive; and open up new business opportunities.

- We invite you to go through our on-line certification:

Products

- INGESA has a wide range of products with unequalled quality guarantee and reliability, which you will see in our technical catalogue.
- We manufacture **dosing systems**, either by weighing or volumetric way, **automatic or manual** mode. After many years in this business we have some standard equipment for an ordinary use, but we also manufacture **custom-made facilities or equipments** which are specially designed for the requirements and needs of our customers.
- We have as well a great variety of **spare parts** for the most of the existing dosing systems in the market.
- We specify the most outstanding ones:
 - **DOSAMAT – Volumetric Dispenser to measure and control liquids –**

- The Dosamat dispensers are operated manually by a single push button or switched automatically to work with the batching plant cycle.
- Every dispenser is assembled with a single reversible pump which supplies the measuring glass from the admixture tank and discharges it automatically to the mixer.
- The dose is preselected manually with an scaled electrode.

- Every dispenser is assembled with a single reversible pump:

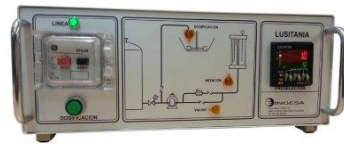

Products

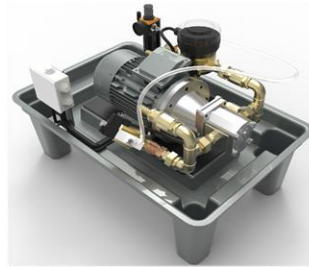

- **LUSITANIA & LUSITRONIC – Volumetric Dosifier with impulse transmitter, preselector and visual control –**

- Volumetric dispenser with impulse transmitter, preselector and dosage visual control using a methacrylate glass.
- Electric control panel with computer connection to automate the process. Self-working and remote control allowed:

- The liquid suction or impulsion is carried out using one pump (reversible) or two, depending on the customer needs:

- **Lusitronic** includes multi-function screen that shows: preset dosage, reserve capacity and consumption, scheduled vein correction and alarms:

Products

- **PESAMAT – Liquid dispenser by electronic weighing machine. Dosage and control at the highest precision and reliability–**

- Dispenser by electronic weighing machine for one or several additives.
- Enclosed extensometric load cell-based weighing.
- Hoppers made with an acrylic material that allows a visual control of the process.
- A microprocessor automates totally the process, reading directly from the display. Diverse peripherals, as a printer, can be connected to the computer.

- Instrument panel to control and protect the whole electronic system. Control screen to adjust and handle manually:

- The liquid suction or impulsion is carried out using one pump (reversible) or two, depending on the customer needs.

Global Foot Print

- INGESA has a network of permanent offices in **Spain** and **UAE**.
- There are currently over 8000 installations operating with our services. Most of them work with our Integrated Maintenance Service. We also have 18 exclusive Delegations or Technical Services spread by all the Spanish market to offer the best service at the highest quality.
- We became one of the leaders in the Spanish market and in 2011 we started our international expansion.

Customers

- The the main **additive manufacturers** trust in our experience and reliability:

- Also work with some direct customers like **Alkifah**, **Isolux**, **Axim Building**, **OHL**, **Hormicemex**. They sell our dispensers to their clients just to cultivate their loyalty and to make them consume more additives.
